Guangzhou LANDY

## Safety Pool Cover Introduction

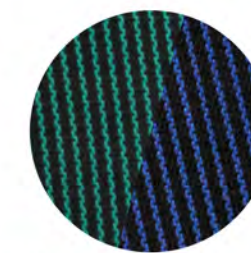

Mesh pool cover is made from polypropylene mesh fabric which water can drain through while keeps debris and leaves out of the pool. It's lightweight but super strong. It can secure the safety of your family members. It meets ASTM F1346-91 standard. It conforms to international safety standards, it can support the weight of two adults and a child, approximately 200kgs.

Good Water Permeability

Anti-Tear

Coil

## Solid Pool Cover

Solid pool cover is made from PVC material. It can keep water, dirt and debris out of the pool, block 100% of sunlight and reduce the evaporation. Solid pool covers will not be suitable for the areas of rainfall or snowfall.

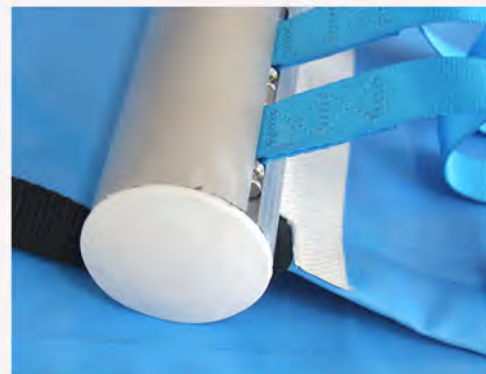

## Solid Pool Cover with AL Tubes

Solid pool cover with AL tubes is the latest innovation in swimming pool safety. It uses aluminium poles which slide through reinforced pockets lengthwise and rests on the brickwork around the pool. One side of the cover is anchored into place with removable anchor bolts and the other side is equipped with ratchets which allow the cover to be tightened to your requirements.

Solid pool cover with AL tubes prevents dirt, droppings and leaves from entering the pool so as to eliminate the need of filtration. It provides 100% shading so there are no algae problems in the pool. What's more, the cover is safe and super-strong which provides an effective protection to prevent your children and pets from drowning and securing your pool at the same time.

## Benefits of Solid Pool Cover with AL Tubes

### ● Safety for children & pets

The load capacity comes up to 220kg (two adults and a child). It is excellent protection for children and pets .

### ● Reduce debris contamination

The cover can prevent dirt, droppings and leaves from falling into the the water which can reduce the need for filtration.

### ● Simplicity of design

The cover spans the entire pool through the AL tubes. One end gets secured and anchored into place with a stainless steel hook and plate. The opposite end have corresponding ratchets which allows the cover to be tightened.

### ● Save money

10.The cover prevents water evaporation up to 98% and reduce the requirement of chemical. Therefore,it allows the owners to save a lot of money on water bill and cleaning.

### ● Material

It is constructed from a generous, durable cross woven polyester, which is PVC coated and UV stabilised. The anti-fungal treatment ensures the cover stays free of mould, even when wet.

### ● Tamper-proof

The lockable strapping system of the cover makes it difficult for a small child to tamper with or attempt to release the cover.

### ● Custom-made to fit almost any size and shape of pool

# Safety Cover Specialized Accessories

# Advantage of Safety Pool Cover

- 1. Customized to suitable any pools.
- 2. Meet the ASTM standard, reassure your safety.
- 3. Anti-UV and anti-algae, keep the pool water clean.
- 4. High quality in produce, service you in every detail.
- 5. Protect the pool, extend the service life of the pool
- 6. Clean, dust-proof, pay less attention to pool cleaning.
- 7. The forming platform provide children more space to play.
- 8. Durable and safety, prevent kids and pets from falling into pools.
- 9. Easy to install, remove and store, make your life more convenient.
- 10. Environmental friendly material, protect the environment in your garden.
- 11. Good performance in water drainage, no need to worry about the rainfall.
